

January 12, 1984

LB 642

it would at least get them out of court and move them on to more substantive matters. So I urge you to pass this amendment and attach the emergency clause. Thank you.

SPEAKER NICHOL: Senator Pirsch to the Scofield amendment.

SENATOR PIRSCH: Senator Scofield, would you yield to a question, please? Could you kind of refresh our memories with what issue that was on resident tuition?

SENATOR SCOFIELD: 933 is non...the formula that computes nonresident tuition.

SENATOR PIRSCH: I see. I see, I wasn't clear on what that did.

SENATOR SCOFIELD: This does not and will not settle any of the arguments related to the justness or unjustness of the formula. That discussion will continue. What this will simply do is to get people out of court over arguing whether the Legislature did its job right.

SENATOR PIRSCH: Okay, thank you.

SPEAKER NICHOL: Senator Lamb.

SENATOR LAMB: Mr. President and members, I think this may be an issue that should not be on a Revisor bill, that it's certainly controversial, and the Education Committee I think should handle it. It doesn't seem to me that this is the proper place to try to settle an argument which is brewing in the state, not only about how the bill was passed but also what the bill contains. And so I guess at this point I would object to the amendment to the bill.

SPEAKER NICHOL: Senator DeCamp.

SENATOR DECAMP: I would like to see the ruling before I do anything. Are you ruling this as okay, or not, germane or is there any....? Mr. President, is it germane? I mean, technically I can see it is germane but it is not germane from the standard of Revisor bills traditionally.

SPEAKER NICHOL: Hang loose a minute.
